Materials & Recycling

Total control of every material used

Okamura collects thorough information on the materials, surface finishing methods, and other aspects of the parts used in its products, from the main components of its office equipment to individual screws. Detailed data on materials are provided upon request.

Recycled materials: **55%**

Recycled materials are used in aluminum and resin parts. These materials make up about 53% by product weight.

Recyclability:

97%

With future recyclability firmly in mind during the design stage, we use homogeneous materials as much as possible. After use, our products can be collected and disassembled into homogeneous materials.

Resins

Polyamide resin is used to ensure recycling in the future. Resins recovered after use are reprocessed and reused by resin manufactures. Okamura is an active user of recycled resins for its products.

Aluminum

Recovered aluminum is processed into a recycled form by alloy manufacturers and later into aluminum. Energy consumption can be reduced by 97% by generating recycled metal from recovered aluminum rather than creating aluminum from its source material bauxite.

Steel

Steelmakers use recovered steel to produce new steel. Steelmaking with recovered steel consumes 75% less energy than steelmaking from iron ore.

Indicating materials Okamura indicates the materials used to facilitate recycling after use.

Reducing Chemicals

GREENGUARD certificated

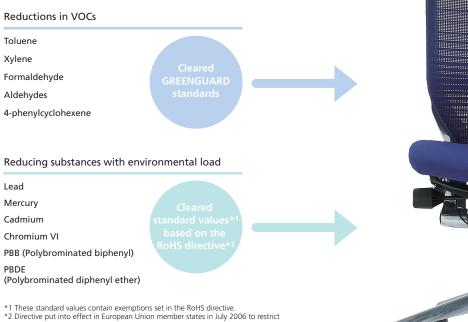

GREENGUARD is an indoor environment air quality standards used to certify products with low chemical emissions for the protection of interior environments. Certification is granted only to products that pass the pollutant emissions testing conducted in process-controlled dynamic environmental chambers following test protocols developed by Air Quality Sciences, Inc. The test protocols comply with ASTM, U.S. EPA, LEED, and BIFMA standards and requirements. OKAMURA CP received GREENGUARD certification in December 2007.

Reducing VOCs to safeguard health

Okamura minimizes the use of formaldehyde, toluene, xylene, and other VOCs, which can result in sick building syndrome and allergic dermatitis. To cite just one example, the snugly fitting backrest and seat meshes of OKAMURA CP were accomplished using an original design requiring a minimal amount of adhesive. Environmental load can be reduced while achieving outstanding comfort and strength.

Minimizing environmental load

Amid calls to limit the use of the earth's resources, the reuse and recycling of post-use products are now a global agenda. To ensure safe and sure progress in recycling, manufacturers must limit the use of substances with environmental loads. The latest round of enhancements in the regulatory framework started with the European Parliament's Restriction of Hazardous Substances (RoHS) directive. Though office furniture is not currently included among the targets of this regime, Okamura is working to reduce substances with environmental impacts in response to customer demand and in anticipation of future legislation.

the use of hazardous substances in electronic and electrical equipment.

GREENGUARD Emission Criteria

	Emission Types	Measure	
	Individual VOCs	<0.1TLV	
	Formaldehyde	<0.025ppm(<0.03mg/m3)	
4-phenylcyclohexene Total VOCs		<0.0033mg/m ³	
		<0.25mg/m ³	
	Total aldehydes	<0.05ppm	

04 LEED Credit Summary

	Catanani	ltere		Contribution	Daint of contribution
Program	Category	ltem		Contribution	Point of contribution
LEED 2009 for Commercial Interiors	Materials & Resources	MR 3.2	Materials Reuse –Furniture and Furnishings	This product (OKAMURA CP) is designed to be refurbished and easy replacement. And it can be used any longer by having proper maintenance. Product can contribute to the this point by reusing. In Japan, Okamura has a service network by its subsidiary, Okamura Support and Service.	1
		MR 4	Recycled content	56.0% (1/2 Pre-Consumer: 5%, Post-Consumer: 53.5%)	1-2
		MR 5	Regional materials	Assembled in Yokosuka city, Kanagawa, Japan. Please contact us in case of the delivery outside of Japan.	1-2
	Indoor Environmental Quality	IEQ 4.5	Low emitting materials, System Furniture and Seating	Greenguard certified	1
	Innovation & Design	ID 1	Innovation in design	High percentage of recycled content.	1-5
LEED 2009 for New Construction and Major Renovations	Materials & Resources	MR 3 Material Reuse		This product (OKAMURA CP) is designed to be refurbished and easy replacement. And it can be used any longer by having proper maintenance. Product can contribute to the this point by reusing. In Japan, Okamura has a service network by its subsidiary, Okamura Support and Service.	1-2
		MR 4	Recycled Content	56.0% (1/2 Pre-Consumer: 5%, Post-Consumer: 53.5%)	1-2
	Innovation & Design	ID 1	Innovation in design	Greenguard certified	1-5
LEED 2009 for Existing Buildings, Operations and Maintenance	Materials & Resources	MR 1	Sustainable Purchasing –Ongoing Consumables	56.0% (1/2 Pra-Consumar, 5% Port Consumer, 53.5%)	1
	MR	MR 2	Sustainable Purchasing –Durable Goods	56.0% (1/2 Pre-Consumer: 5%, Post-Consumer: 53.5%)	1-2
