

PearsonLloyd

Slim chair Collection

IT

Dalla collezione di sedute slim progettata dal duo britannico PearsonLloyd, nasce la nuova *slim chair*. Essenziale ed ergonomica, interpreta perfettamente il tema del design della seduta elementare contemporanea, *slim* è la prima seduta in polipropilene firmata da Alias nell'ottica di completare l'offerta di prodotto, mantenendo l'approccio attento al design. *Slim chair* è una famiglia che nasce dalla ricerca di una seduta universale e flessibile da inserire facilmente in diversi contesti, dagli uffici al contract, fino alle residenze private. La scocca è realizzata attraverso uno stampo che, oltre a consentire un'alta tenuta strutturale coniugata a spessori ridotti al limite, permette una minima percentuale di fibra di vetro di rinforzo, garantendo così un'ottima qualità superficiale.

DE

Aus der Stuhlkollektion slim des britischen Duos PearsonLloyd entsteht der neue *slim chair*. Essentiell und ergonomisch, interpretiert slim chair perfekt das Thema des Designs elementarer moderner Sitzgelegenheiten und ist der erste Stuhl aus Polypropylen von Alias. Ziel ist die Vervollständigung des Produktangebots mit unverändertem Blick auf die Bedeutung von Design. Die Produktfamilie *Slim chair* entstand innerhalb der Recherche in Bezug auf einen universellen, flexiblen Stuhl für unterschiedliche Bereiche: vom Büros bis zum Contract und zum privaten Wohnraum. Die Struktur ist formgepresst und bietet festen Halt in Kombination mit maximal verringerter Dicke und einen minimalen Anteil an verstärkender Glasfaser, wodurch eine optimale Oberflächenqualität garantiert wird.

EN

The slim collection of seats designed by British duo PearsonLloyd acquires a new family: *slim chair*. Essential and ergonomically designed, the new creation interprets most effectively the theme of the quintessential contemporary seat and is the company's first polypropylene seat, produced with a view to rounding off the Alias product line while continuing to give undivided attention to design. *Slim chair* is a family born of the search for a universal and flexible seat that can blend with ease into different environments, from the office to the contract sector, and even private dwellings. The shell is made with a mould that ensures high structural strength combined with thickness values reduced to the very minimum, and requires a minimal percentage of glass fibre reinforcement, making for optimal surface quality.

FR

La nouvelle *slim chair* naît de la collection d'assises slim du projet du duo britannique PearsonLloyd. Ergonomique, elle interprète parfaitement le thème du design de l'assise élémentaire contemporaine. *Slim* est la première assise en polypropylène signée Alias en vue de compléter l'offre tout en maintenant une approche attentive au design. *Slim chair* est une gamme née de la recherche d'une assise universelle et flexible à intégrer aisément dans différents environnements, des bureaux au contract, jusqu'aux résidences privées. La coque est réalisée à partir d'un moule assurant une grande tenue structurelle. Les épaisseurs sont réduites au maximum, tout en intégrant un taux minimal de fibre de verre de renfort pour assurer une excellente qualité de surface.

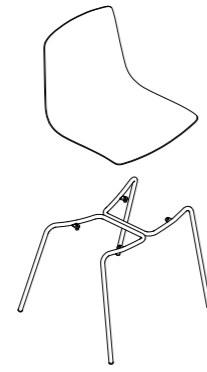

SLIM CHAIR
