ARCO

Greatest comfort, versatility and sober elegance characterize ARCO, the new product launched by lapalma at Salone del Mobile 2016. Signed by Francesco Rota, the art director of the brand, ARCO is an eclectic chair with a main feature: an elegant backrest of curved wood goes around the seat until it almost disappears inside that, creating a refined aesthetical continuum. ARCO is as comfortable and embracing as a small armchair: it welcomes your back providing not only lumbar support but also good side support, thanks to the uniform curving of wood. The comfortable solid wood seat is proposed in a version essentially focused on matter or in an even more comfortable upholstered version, to be covered in leather and eco leather, or in one of the many fabrics in the collection. The padded seat is designed with a very large shape and a certain internal thickness, in order to ensure maximum comfort despite of the slim and streamlined shaping. The backrest, with its characteristic arched shape, is iconic. Rigorous and eclectic in the bleached oak or natural ash versions, and with a contemporary flavor in its white lacquered or black open pore variants, it may even be slightly padded, giving the chair a more accentuated comfort. Available with different bases, Arco satisfies every need, bringing in a home or in an office, in elegant contract spaces, bars or restaurants the balanced and comfortable essentiality of lapalma.

use and maintenance instructions

Clean all parts in wood, leather, fabric and metal with a damp cloth or a diluted neutral cleaner. Do not use cleaners with alcohol, bleach, solvent or abrasive products. Any liquid spill on the product must be wiped up immediately. When lifting or moving the product, hold it on the structure and not under the seat. The product should not be subjected to unbalanced weights, as it is designed for a proper rest on the foothold (on four legs or on the base). Our company relieves from any responsibility in case of damage caused to fragile floors. Avoid any improper use of the product: do not step on the product, on the footrest or on the armrests. Avoid any movements that could compromise the proper functionality of the product or the safety of the users. Wood and leather, being natural materials, could be easily damaged. Small impurities or imperfections are within quality standard range. Do not expose the product to weather conditions or atmospheric agents, nor to heat sources over 45°C. Also products for outdoor use could be afflicted by atmospheric agents. The product could undergo possible exterior changes due to particular exposure to heat, humidity and saltiness. An appropriate and frequent maintenance and cleaning of the product enhances its durability. The product could change colour and shade, if exposed to direct sunlight. Maintenance has to be carried out by experienced staff. Dispose of the package only after assembling the product, in order to avoid the loss of ironmongery and components. Once the product has been dismantled, the product itself or its components must be given to the public garbage disposal system, according to the legislation in force.
